

DEVICE FOR SELECTIVELY BLOCKING
REMOTE PURCHASE REQUESTS

ABSTRACT

5 A method for partially verifying the legitimacy
of a remote purchase request based on a card number from a
card issuing financial institution. The method includes
receiving and storing a first purchase request information
set including an origin and a card number. Further, the
10 origin and the card number are sent to the card issuing
financial institution to determine if the origin matches an
origin on file for the card number at the card issuing
financial institution.
